Aptitudes principales

Automation

Node.js

Front-End Development

Certifications

Programming in Python

Tech camp perficient

Django Web Framework

Certificado de la Competencia
Internacional de Programación
Colegial (ICPC)

Introduction to Back-End
Development

Honors-Awards

Encora bootcamp winner

Mateo Silva

Java programer | python developer | Js Developer | QA | FullStack
developer | CI/CD | Machine Learning
Cali, Valle del Cauca, Colombia

Extracto

Hello, my name is Mateo Silva, I study software engineering. I love
programmed and learn new form about that. I'm very communicative
and quiet, that is very important for me because when I have many
works in progress I'm always wait and think in the solution. Normally,
my teamwork say that I'm progressively think in them.
I have many abilities, I can work in team very well, I always have
been leader the people in my team is very important because the
projects need has many components and different abilities, so the
team need be variety and all team works are important. I've used
excel for programmed projects, my dad uses this tables for do
economics projects and He teach me any things for programmed
long projects and I used this tables in engineering method. I'm going
to able create great and complicated software's. In my career I've
been learned many things that I'll serve me for create this software
and in my case, I've learned very good, I'm getting ready for be a
good program and work in great place.

Experiencia

Universidad Icesi
2 años 10 meses

Monitor de computacion en internet
agosto de 2024 - Present (11 meses)

I help students with her skills in advanced web development

Monitor Club de programacion
septiembre de 2022 - Present (2 años 10 meses)
Cali, Valle del Cauca, Colombia

Monitor de algoritmos y programación
enero de 2024 - diciembre de 2024 (1 año)
Cali, Valle del Cauca, Colombia

Monitor de Estructuras discretas

enero de 2023 - mayo de 2024 (1 año 5 meses)
Colombia

Banco W
Business Automation Specialist
septiembre de 2024 - junio de 2025 (10 meses)

We build AI-powered chatbots to automate financial processes, especially microcredit lending. Our WhatsApp-based solutions streamline loan applications, approvals, payments, and follow-ups, cutting wait times and enhancing customer experience
